Model: Cooler 10

It does not exceed the space occupied by the Euro-Pallet, the footprint is 31 1/2" x 39 1/2" (800 x 1000 mm).

TECHNICAL FEATURES

The lid, which closes tightly even without hooking the closing mechanism, makes repeated draws easier. Equipped with seats for stacking.

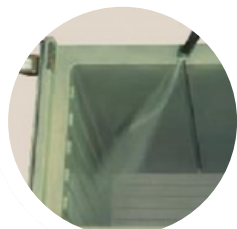

The height of the container and, consequently, depth make it easy to scoop loose pellets out from the bottom of the container.

The walls have internal metal reinforcements that are filled with expanded polyurethane foam.

Smooth internal bottom.

Rotomolding monobloc structure, made of food-grade material. The absence of joints facilitates washing and sanitation.

Closing mechanism (with buttonhole for seal insertion) and hinges are of stainless steel.

The pallet base can be either stainless or galvanized steel.

Gas struts are protected from accidental bangs or ice.

Silicon gasket is removable.

On the bottom there is a drain for water discharge.

Robust and easy in maintenance, the metal components are screwed on plates imbedded into the shell of the product.
