## Model: Cooler 20

Capacity 21 cu.ft. External Standard USA Pallet 40"x 48"

### TECHNICAL FEATURES

The lid, which closes tightly even without hooking the closing mechanism, makes repeated with draws easier. Equipped with seats for stacking.

Closing mechanism (with buttonhole for seal insertion) and hinges are of stainless steel.

Robust and easy in maintenance, the metal components are screwed on plates imbedded into the shell of the product.

The pallet base can be either stainless or galvanized steel.

The walls have internal metal reinforcements that are filled with expanded polyurethane foam.

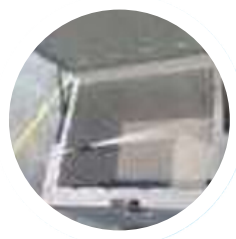

Gas struts are protected from accidental bangs or ice.

Smooth internal bottom.

Silicon gasket is removable.

Rotomolding monobloc structure, made of food-grade material. The absence of joints facilitates washing and sanitation.

On the bottom there is a drain for water discharge.
